

WE COME IN PEACE TO GET HELP

Vu Pham

Once upon a time, there was a small planet that appeared long before the Earth called Neveron-4. It is like the Earth but a little smaller; it has fresh air and green trees, and on this planet, there is a native people called the Neveronian's. They are very gentle and intelligent, but they are not like Earthlings because their eyes are incredible; they can see from far away or very small things. One day, in the village of Nefiti, everyone was still sleeping when suddenly there was a big explosion in the sky. The villagers suddenly woke up and looked up to see two large asteroids colliding and creating a planet. 200 (Neverion) years have passed, and the villagers are still trying to study the planet, but no one can think of a name or what it looks like. Then one day, a dot of light shot from the unknown planet to Neveron-4 with the speed of light and landed in the forest. The people in the village go back into their houses, and the village chief leads a small team into the forest to explore. They went into the forest for 5 minutes when they saw a very large ship, big enough to hold more than 100 people inside. The village chief approached the boat carefully and slowly. Suddenly the back door of the ship opened, and five people stepped out; they looked much smaller than Neverions.

"Who are you?" asked the village chief.

"We are Earthlings," the Earthling replied.

"Earthman?" The village chief muttered

"We think the Earth is devoid of life," said the village chief.

"Earth has been inhabited for a long time, but one day a laboratory in China blew up, and in that room they tested a new virus called COVID-19 to destroy cancer.

But something went wrong, so instead of killing cancer, it destroyed the lung. Because it spreads very quickly, anyone who injects it into their body will suffocate and die. It spread to the whole world, and we were the only ones who survived," the Earthling explained.

"We came here in peace," the Earthling said.

"Do you have a name?" asked the village chief suspiciously.

"Aaron, my name is Aaron," the first one replied.

"My name is Alexa," said the second one.

"My name is Max," said the third person.

"My name is Leo," replied the fourth person.

"My name is Lea," the last one said.

"So what's your name?" Alexa said to the village chief

"My name is Zephyr," said the village chief.

"Why did you come here?" Zephyr asked

"We're here to ask for help," Aaron said.

"Why?" Zephyr asked.

"Because Lea has a fever, and she's the only one who can find an antidote," Leo said, looking worried.

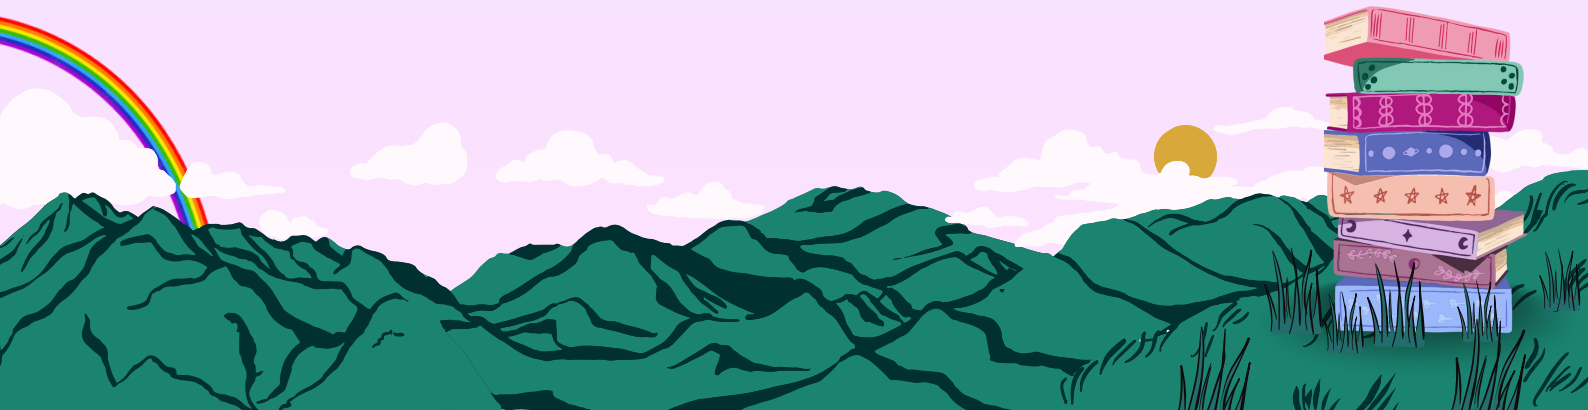

So the village chief led them back to the village.

They walk slowly back to the village.

They heal Lea with a special potion and then try to figure out how to make a cure for the pandemic on Earth. After a few days, they know that they need the juice of a very rare kind of mushroom that only grows in places that have a lot of sunlight, called the sun mushroom.

"That's impossible; mushrooms don't grow in a place that has direct light," said Max.

"Don't worry, we have that kind of mushroom growing here, but it is very tricky to find," said Zephyr calmly.

So they start searching for the mushroom; they look everywhere, but there's no sign of it, and they start to feel frustrated. but when they were about to give up, Zephyr found it. They pick a bunch of it and bring it back to the village, where they start working on how to extract the juice from it. They smash the mushroom, soak it in water for twenty days, and then dry it to collect the juice when it drips down. After that, they put it in a small tube and gave it to Max. They build a teleporter to teleport Aaron, Max, Alexa, Leo, and Lea back to Earth.

"Before you go," said Zephyr slowly.

"If you want to use it, you have to crack it open and throw it on the ground, and then the virus will disappear," said Zephyr.

Max nodded and then teleported back to Earth. When they were back on earth, they cracked the tube open and then threw it on the ground, and suddenly the sky changed and everything was back to normal.
